

Test User Feedback received on Friday 30<sup>th</sup> of November

*"I think it's really good, I really like the colours and the images and the quiz is good too. Sometimes all the different animations can be annoying and you can't skip ahead by clicking the mouse. This can be a bit frustrating. Aside from that, I like it a lot."*

I decided not to change any of the animations, as I wanted the whole presentation to be attention grabbing, in case other students walked past while one student was using the information point.

I also didn't want to allow users to skip ahead by clicking on their mouse as this would mess up the way pages linked with one another and it would ruin the way that the quiz worked.
